## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of Group III, claims 19-21 in the reply filed on February 23, 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 19 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Treasure Tower. Treasure Tower discloses a teaching method for reinforcing positive behavior comprising the steps of having a person recognize positive behavior of a second person and giving a first thing to the second person (see statement #3: "Super Student Token earned as a result of good behavior"), having the second person put the first thing (the token) onto a second thing (the Treasure Tower) which automatically outputs a third thing (a toy) in response thereto (see statement #4).

***Allowable Subject Matter***

Claim 21 is allowed.

The following is a statement of reasons for the indication of allowable subject matter: There is no disclosure or suggestion of a method having all of the claimed limitations. In particular, there is no suggestion of an apparatus having an article path and a token path which intersect in the manner recited. This feature has functional utility, as discussed at page 15, lines 23-32 of the specification, in that the intersection allows an inserted token to physically push the article from its seat to allow a user to remove it from the apparatus.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Clarke, Bennett, Kollath, Dunford, Scranton, Blumberg, Wilson, Green and Papaleo disclose various methods and devices for improving a child's behavior. Stroll and Collier disclose methods and devices for redeeming prizes.
